

CNR 2010 – X Portuguese's National Radiology Congress

XESequipa and XES_mis were present at CNR2010 held in at Tivoli Marinotel Hotel in Vilamoura, from 12th to 15th of May.

During the 4 days of congress, it was possible to see our solutions XES_mis running. Visitors were able to see one workstation **aycan OsiriX PRO**, interact and verify the ease, speed and added value of this workstation, and knowing the solution of printing DICOM images in paper **aycan**

xray-print

and observe the examples provided attesting o the quality of printed images. We had a great acceptance from the majority of visitors to our stand, who were impressed by the solutions we offer to our customers.

The XESequipa Symposium, held on the 14th, by 13:00, and were it was presented **aycan** workstation

OsiriX PRO 64 bit

was a real sucess, with the presence of numerous participants. We receive many positive comments from both users of OsiriX " open source version" as well as those who do not know yet this amazing advanced workstation of image processing.

Our thanks to all that visited us at booth and attended the Symposium by the positive feedback and acceptance of our solutions.
